Study Details

Project Background

I am currently creating a bookstore app that makes it easy for users to order books from home, and with this app users can see recommendations based on the types of books they like.

Study Details

Research Questions

1. How far is your house from the nearest bookstore and Do you prefer shopping for books offline or online?
2. Do you find any confusing feature in the app?
3. How long does it take for you to use our home delivery feature?
4. How do you usually decide which book to buy?
5. Do you find it easy to find the book you want to read?

Participants

3 participants

1 male and 2 female, the ages are between 18-21

Methodology

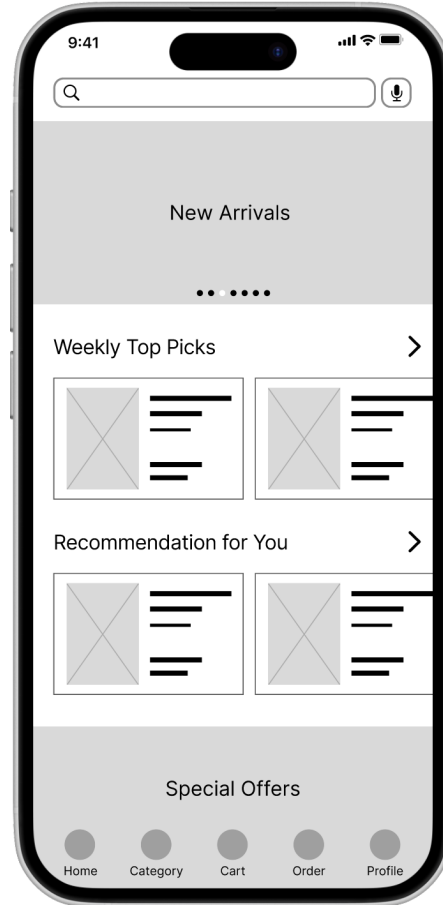

10-15 minutes per participant

1 participant at college in Bukittinggi, 2 participants remote

Unmoderated usability study

Participants were asked to try our low-fidelity prototype

Prototype / Design Tested

QRIS

e-Wallet

Bank Transfer

Cash on Delivery

Checkout

All of the participants confused because there is no checkout confirmation

Supporting evidence from the usability study.

- 3 out of 3 participants were surprised because they made an order without confirmation.
- Participants feel annoyed

"Seriously??, no confirmation? i haven't even checked my order yet"

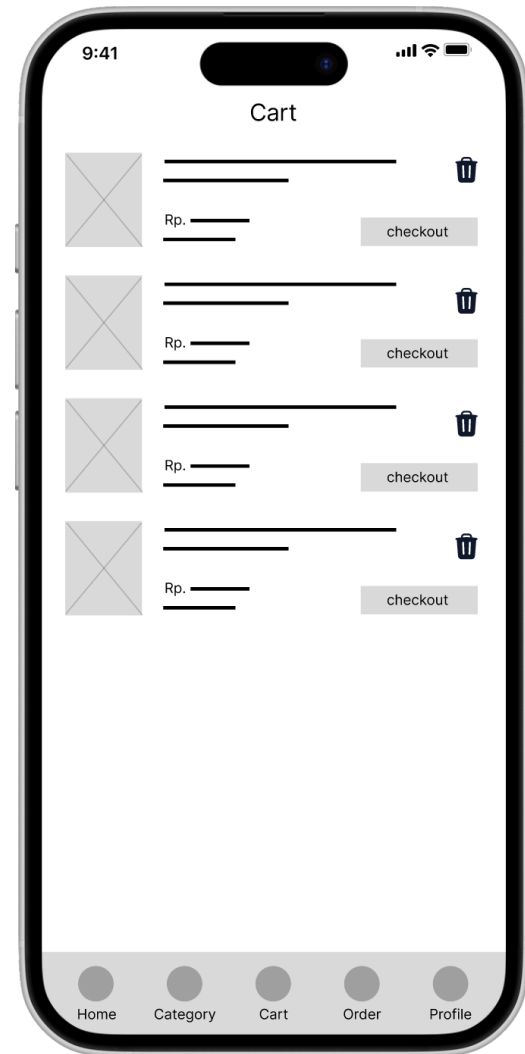

Participants felt annoyed about cart feature

Supporting evidence from the usability study.

- 1 of 3 participant felt the cart feature is not working properly
- Participant can checkout via cart without fill out the order form.

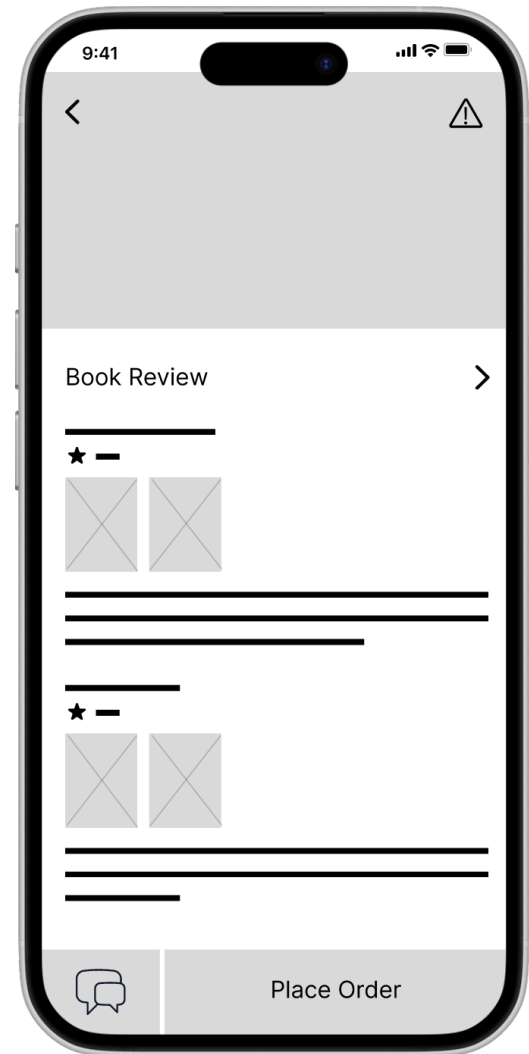

"Huh, what is checkout button means in this section, so annoying"

participants want related book at the end of book details.

Supporting evidence from the usability study.

- 2 of 3 participant said it would be better if there are related books in end of book details.

Insights & Recommendations

Research insights

Need the
checkout
confirmation

Providing a confirmation screen or message reassures users that their order was successfully placed and reduces uncertainty about payment and delivery status.

confused where
to add the
address

The address input section needs clearer visibility or guidance within the checkout flow so users can easily identify where to provide delivery details without hesitation or backtracking.

annoyed about
cart feature.

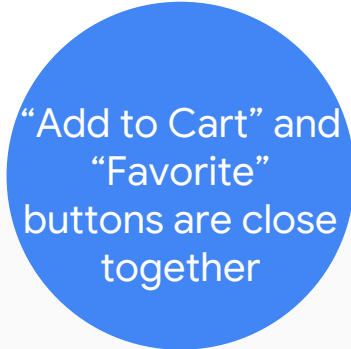

Improve the shopping cart feature so that users can use the feature comfortably.

Research insights

A solid blue circle containing white text.

Some hit points
are so small

Users need larger, more
accessible touch areas
for critical actions

A solid blue circle containing white text.

“Add to Cart” and
“Favorite”
buttons are close
together

Users need clearer
spacing or visual
separation to prevent mis
clicks and improve task
accuracy.

Recommendations

- Place the address section in the order format to make it easier for users if they want to change the shipping address.
- add an order confirmation screen so that users can check their orders first
- Cart feature update

Thank you!
